

## Press release

### **'Best Connected Home Communications Hub' from Technetix**

Burgess Hill, West Sussex, UK June 8<sup>th</sup> 2011 – An Ethernet to coax bridge designed by Technetix for use with MoCA<sup>®</sup> in-home networking was awarded 'Best Connected Home Communications Hub' at the Connected Home Global Summit 2011.

Technetix MoCA<sup>®</sup> enhancing products improve high-speed Ethernet communication within the home and provide better room to room connectivity. The award winning TECB-01 Technetix Ethernet to coax bridge (TECB) is a single port Ethernet bridge based on the MoCA<sup>®</sup> 1.1 standard. It provides simple plug and play installation into existing home coaxial networks, offering easy MoCA<sup>®</sup> connectivity.

The TECB-01 comes from a full range of Technetix enhanced dongles, Point of Entry filters and passives that improve the infrastructure, maximising network performance.

Jan Ariesen, VP of Development Engineering at Technetix says: "I'm very pleased that our Ethernet to coax bridge received 'Best Connected Home Communications Hub' at the Connected Home Global Summit. The product is one of a number we have designed to improve the performance and ease the installation of in-home MoCA<sup>®</sup> networks. It's always encouraging to have our achievements recognised by the connected home community.'

The awards ceremony took place on Wednesday 25<sup>th</sup> May at the Connected Home Global Summit gala dinner and awards ceremony.
